

STATEMENT OF PURPOSE

Introduction:

My name is **Madssar Aftab S/o Aftab Hussain**, I am 23 years old, and I was born in District Mirpur AJK, Pakistan. I have done Bachelor in Software Engineering from “National University of Modern Languages Islamabad”. I have been striving for the best throughout my academic career and want to be excellent in the future. I am very happy to have the opportunity to find my letter of intent to study in a master's program in the UK. British universities are highly regarded in the field of professional education and are also among the best universities in the UK due to their educational expertise.

Why Birmingham City University:

This was not a hasty decision; it took several weeks to find the ideal location for study. The Birmingham City University has grabbed my heart due to its hot location that makes everything accessible to foreign students. The university location can aid me to live in the economical zones and it will have a great impact on my personality throughout my life. Apart from that, the university has received many rewards and it has been named one of the best universities in the UK. Furthermore, this university features the top faculty members; all the professors are skilled and knowledgeable about modern delivery and learning methods. Many courses have professional bodies' mandates and offer work placements, and the university has strong ties with the industries.

Why I Choose the United Kingdom:

The UK has hosted international students at its universities for many years. British universities offer highly respected and internationally recognized degrees in a wide range of subjects. I have always been interested in studying in foreign colleges and I believe I am fully qualified to study for a master's degree in the UK. One of the reasons I want to study in the UK is that when you experience a multicultural environment and meet people from different backgrounds, a foreign college extends your approach to all aspects of life

The UK has one of the most stable economies when compared with other countries across the globe. Graduates are provided with opportunities to flourish. Engineering researchers are world-class in the UK, not ignoring the hardworking and talented individuals by providing them with great possibilities. Financially, the UK suits me as well as the education is not expensive, and the quality of pedagogy is top of the line. As well as being a good place for higher education, England is also an ideal place to live. Provides a warm and friendly multicultural society for people from more than 200 countries/regions. The British are known to be among the friendliest cities in the world, the city is safe, clean, and has a low crime rate.

Why I want to study Masters

Computer Science related courses have a high demand for success in the present era and these courses are among the high-paid courses across the globe. I've studied Software Engineering in my Bachelors, so I want to continue my studies in the same domain. I require such course at the international venue to gain hands-on experience with cutting-edge technology as well as to improve my work prospects in my home country, where there are several job chances in this field. This course will help me to enhance my skills and leadership abilities. The modules of the course allow me to get in-depth knowledge of Software, Web, and Database development. The modules of this course also include fundamentals of Artificial Intelligence and Project Management which attract me a lot. I am inclined toward working as a full-stack developer so this course will help me to achieve my goal.

Conclusion:

To conclude, It will be an honor for me to be a part of your prestigious educational culture. It will not only polish my abilities, skills, and personality but will also make me a successful person. In every walk of life, I would be grateful for your kind consideration of my application and looking forward to hear from you. The sophisticated infrastructure and diverse learning environment shall provide me with all the necessary ingredients to pursue my career and accomplish my dream of transforming Pakistan in becoming a better society.

Kindest Regards,
Madssar Aftab
